

COPPER ROOFING

Copper Roofing is without a doubt the best and most beautiful roof you can buy. Other metals are very attractive but none can match the ever-changing beauty of copper. Most people who own them will say that the roof evolves with you, changing in appearance as you journey through life.

Copper roofs have existed since early civilizations. It was chosen because it enhanced the beauty of any structure. Copper exceeds all possible expectations.

After the installation, copper will begin to evolve going from a bright shiny color to different stages of bronze subtle hues of green before reaching its final and very familiar variegated green color. Depending on where the roof is located, the process could take as long as 30-35 years.

Copper Diamond Shingle

Aged Copper Roof

Copper Slate

FUTURE ROOF COPPER DIAMOND SHINGLE:

Our 16 oz. Copper Diamond Shingles have been used for centuries. Architects will use this shingle on accent structures to, as one architect said, "Kick the roof up a notch". These pieces are very versatile. They interlock from bottom to top. They can be installed on pitches of 4:12 or greater. The diamond shingles can also be installed on vertical exterior and interior walls, or even as a distinctive copper wall fountain.

FUTURE ROOF COPPER SHINGLES AND SLATES:

Our 16 oz. copper shingles and slates are manufactured to give the architect, roofing contractor and homeowner just the product they need for versatility, ease of installation, beauty and durability. Each of the copper shingles and slates interlock front to back and side-to-side forming a watertight seal against all the elements for years to come.

Future Roof copper Shingles and Slate can be installed on pitches of 4:12 or greater and vertical walls as well.

FUTURE ROOF COPPER ROOFING

FUTURE ROOF COPPER RUSTIC SHAKE:

Our 16 oz. Copper Rustic Shake provides the customer with a larger profile roofing panel. These 4 ft. shake panels consist of six irregular shake impressions with varying heights of the impressions from 1 3/8 "to 3/4". Architects and homeowners have the option to use this product on any home although a ranch style would fit this profile to perfection.

Copper Shake

FUTURE ROOF COPPER MEDITERRANEAN TILE:

Our 20 oz. Copper Mediterranean Tile is very popular and can give any structure that much desired old world appearance.

FUTURE COPPER ADVANTAGES:

1) Future Roof Copper Roofing products are higher initial cost products but copper roofs will last a lifetime. Copper will resist fire and corrosion due to salt water or severe weather or industrial conditions.

2) Every ounce of copper is recycled due to its high salvage value. Copper is environmentally safe and is considered to be a "Green Roofing Product".

3) All our Future Roof Copper products shown feature "hidden fasteners". Hidden fasteners last longer as they are not exposed to severe weather conditions.

4) Patina accelerant spray solutions are available through local suppliers that will turn your new copper roof to a green variegated color in just 24 hrs.

5) Future copper roofing is made from solid 16 oz. or 20 oz. copper. Not copper plated stainless steel or copper foil roofing products.

6) We carry copper coils on our floor at our manufacturing facility, awaiting your order. In this way we are able to reduce your wait time and assure you of a firm price.
